

PWS Information

Purpose of this worksheet: For water systems to document basic system information.

Facility Information

Water System Name:

La Mesa Water Cooperative

PWSID:	Population Served (number of people):	Number of Service Connections:	PWS Type:
NM3500123	650	335	<input checked="" type="checkbox"/> CWS <input type="checkbox"/> NTNCWS

If you are a CWS, do multi-family residences comprise at least 20% of the structures you serve? No

Mailing Address

Street or P.O. Box:

PO Box 53

City or Town:	State:	Zip Code:
Placitas	NM	87043

System Contact Person

Name:	Title:
Jock Embry	President
Telephone:	Email:
505-771-2330	jock_embry@lamesawatercoop.org

Person Who Prepared Inventory (if different from above)

Detailed Inventory

PWS Name: La Mesa Water Cooperative
PWSID: NM3500123
Date Last Updated: 4/3/2024

Main data table with columns: Location Information, System-Owned Portion, Customer-Owned Portion. Includes fields for Unique Service Line ID, Location Identifier, Sensitive Population, Disadvantaged Neighborhood, System-Owned Portion Service Line Material Classification, Service Line Installation Date, Service Line Size, Basis of Material Classification, Was the Service Line Material Field Verified?, If "Yes" Service Line Material Was Field Verified: Describe the Field Verification Method, Enter the Date of Field Verification, Notes, Customer-Owned Portion Service Line Material Classification, Service Line Installation Date, Service Line Size, Basis of Material Classification, Was the Service Line Material Field Verified?, If "Yes" Service Line Material Was Field Verified: Describe the Field Verification Method, Enter the Date of Field Verification, Notes.

Detailed Inventory

PWS Name: La Mesa Water Cooperative

Inventory Methodology	
PWS Name: La Mesa Water Cooperative	
PWSID: NM3500123	
Enter Date Last Updated:	04/03/24

Purpose of this worksheet: For water systems to document the methods and resources they used to develop and update their inventory.

Part 1: Historical Records Review	
Type of Record	Describe the Records Reviewed for Your Inventory and Indicate Your Level of Confidence (e.g., Low, Medium, or High)
1. Previous Materials Evaluation <i>Example: Locations of Tier 1 lead tap sampling locations that are served by a lead service line.</i>	NA, no lead service lines; system built after 1986; High
2. Construction Records and Plumbing Codes <i>Examples: Local ordinance adopting an international plumbing code. Permits for replacing lead service lines.</i>	NA, no lead service lines; system built after 1986; High
3. Water System Records <i>Examples: Capital improvement plans. Standard operating procedures. Engineering standards.</i>	NA, no lead service lines; system built after 1986; High
4. Distribution System Inspections and Records <i>Examples: Distribution system maps. Tap cards. Service line repair/replacement records. Inspection records. Meter installation records.</i>	NA, no lead service lines; system built after 1986; High
5. Additional Records Required by Your State	NA, no lead service lines; system built after 1986; High
6. Other Records	Sandoval County Assessor website (https://eaweb.sandovalcountynm.gov/Assessor/web/) was searched to confirm house construction dates for accounts 1 -150, accounts 300-501 are in Sundance Mesa subdivision which was approved in 1994; all after 1986; High

Part 2: Identifying Service Line Material During Normal Operations	
1. During which normal operating activities are you collecting information on service line material? Check all that apply.	
<input type="checkbox"/> Water meter reading <input type="checkbox"/> Water meter repair or replacement <input checked="" type="checkbox"/> Service line repair or replacement	<input checked="" type="checkbox"/> Water main repair or replacement <input type="checkbox"/> Backflow prevention device inspection <input type="checkbox"/> Other
If "Other", please explain:	
2. Did you develop or revise standard operating procedures to collect service line material information during normal operation? No If "Yes", please describe:	

Part 3: Service Line Investigations	
1. Identify the service line investigation methods your system used to prepare the inventory (check all that apply). If a water system chooses an investigation method not specified by the state under 40 CFR §141.84(a)(3)(iv), state approval is required. Note that investigations are not required by the LCRR but can be used by systems to assess accuracy of historical records and gather information when service line material is unknown.	
<input type="checkbox"/> Visual Inspection at the Meter Pit <input type="checkbox"/> Customer Self-Identification <input type="checkbox"/> CCTV Inspection at Curb Box - External <input type="checkbox"/> CCTV Inspection at Curb Box - Internal <input type="checkbox"/> Water Quality Sampling - Targeted <input type="checkbox"/> Water Quality Sampling - Flushed <input type="checkbox"/> Water Quality sampling - Sequential	<input type="checkbox"/> Water Quality Sampling - Other <input type="checkbox"/> Mechanical Excavation <input type="checkbox"/> Vacuum Excavation <input type="checkbox"/> Predictive Modeling <input checked="" type="checkbox"/> Other
If "Other", please explain:	
Sandoval county property records	
2. If "Predictive Modeling", please briefly describe the model and inputs used:	
3. How did you prioritize locations for service line materials investigations? For example, did you consider environmental justice and/or sensitive populations, did you use predictive modeling, and/or did you target areas with high number of unknowns?	
NA	

Inventory Summary	
PWS Name: La Mesa Water Cooperative	
PWSID: NM3500123	
Enter Date Last Updated:	04/03/24

Purpose of this worksheet: For water systems to provide a summary of their service line inventory, including information on ownership, inventory format, and the number of service lines for each of the four required materials classifications.

Part 1. General Information	
1. Is this the Initial Inventory or an Inventory Update ?	Inventory Update
2a. Who owns the service lines in your system? <i>If other, please explain below.</i>	The entire service line is owned by the water system
2b. Is there documentation that defines service line ownership in your system, such as a local ordinance? <i>If yes, please describe below and explain where ownership is split (e.g., property line, curb stop).</i>	No
3a. Describe when lead service lines were generally installed in your system.	
NA, no lead service lines	
3b. When were lead service lines banned in your system? Reference the state or local ordinance that banned the use of lead in your system.	
1986	
4. Do you have lead goosenecks, pigtails or connectors in your system?	No
5. What is your overall level of confidence in the inventory (<i>i.e.</i> , "Low", "Medium", or "High.") Please explain your rationale below.	
High	

Part 2. Inventory Format
Describe your inventory format in the space provided below (<i>e.g.</i> , the Detailed Inventory worksheet, custom spreadsheet, GIS map). Provide the filename and/or web address if applicable. Note that the state may require you to submit your detailed inventory of each service line in your distribution system.
The Detailed Inventory worksheet

Part 3. Inventory Summary Table ¹		
<i>If you are using the Detailed Inventory worksheet, the classifications you select in the Column "Entire Service Line Material Classification" (Column X) will be used to calculate the total number of service lines for each of the four material classifications below. Otherwise, enter the number of service lines in the aqua-colored cells. Remember this is the classification for the entire service line.</i>		
Service Line Material Classification	Definition	Total Number of Service Lines (REQUIRED to be reported under the LCRR)
Lead	Any portion of the service line is known to be made of lead. ²	0
Galvanized Requiring Replacement (GRR)	The service line is not made of lead, but a portion is galvanized and the system is unable to demonstrate that the galvanized line was never downstream of a lead service line.	0
Non-Lead	All portions of the service line are known NOT to be lead or GRR through an evidence-based record, method, or technique.	335
Lead Status Unknown	The service line material is not known to be lead or GRR. For the entire service line or a portion of it (in cases of split ownership), there is not enough evidence to support material classification.	0
TOTAL		335
Notes		
¹ This summary table is for reporting material for the entire service line connecting the water main to the customer's plumbing. See the Classifying SLs worksheet for additional guidance on assigning a materials classification to the entire service line when ownership is split. Remember that systems must track the system-owned and customer-owned portions separately in their inventory.		
² A lead-lined galvanized service line is consistent with the definition of an LSL under the LCRR ("a portion of pipe that is made of lead, which connects the water main to the building inlet") (40 CFR §141.2) and must therefore be classified in the inventory as an LSL. Do NOT, however, count non-lead service lines with a lead gooseneck or pigtail as lead service lines unless required by your state.		

Public Accessibility Documentation	
PWS Name: La Mesa Water Cooperative	
PWSID: NM3500123	
Enter Date Last Updated:	10/25/23

Purpose of this worksheet: For systems to provide documentation to states on how they met the public accessibility requirements of the LCRR.

1. Select the location identifiers that you use for your service line inventory. Check all that apply.

- Address
- Street
- Block
- Intersection
- Landmark
- GPS Coordinates
- Other

If "Other", please describe:

account number (unique for each property / service line); property legal description

2. Does **every service line** have a location identifier? Yes

If "No", explain. Remember that location identifiers are required for service lines that are lead and galvanized requiring replacement.

3. How are you making your inventory publicly accessible? Check all that apply. *Remember that if your system serves > 50,000 people, you **must** provide the inventory online.*

- Interactive online map
- Static online map
- Online spreadsheet
- Printed service line map
- Printed tabular data
- Information on water utility mailings or newsletter
- Hard copy information available in water system office
- Other

If "Other", please describe:
